

Rawlings Muhinja

Credit Risk Intelligence — Financial Disclosure Verification & Real Estate Risk Analytics

Nairobi, Kenya · muhinja2002@gmail.com · linkedin.com/in/rawlings-muhinja · github.com/muhinja2002-svg · muhinja2002-svg.github.io

SUMMARY

I work on credit risk from two directions: independently verifying financial disclosures that institutions publish but rarely audit themselves, and building real estate credit risk intelligence at NairobiPulse Intelligence, which produces quarterly apartment market intelligence calibrated to credit risk parameters for Kenyan DT-SACCOs and mortgage lending desks. Self-taught data analyst with hands-on delivery across Python, SQL, and BI tooling; currently studying Economics & Data Analytics at Mount Kenya University.

INDEPENDENT VERIFICATION WORK

Co-operative Bank of Kenya — NPL Trajectory Reconciliation *(Live)*

Independently reconstructed and verified three years of non-performing loan disclosures against Co-op Bank's public filings, reconciling a reported ratio drop from 17.1% to 14.5% against the underlying shillings-based recovery. Published on Substack.

Kenya Power — Auditor-General Reconciliation *(Live)*

Reconciled four consecutive years of Auditor-General findings on Kenya Power against the company's own shareholder narrative, surfacing a flagged Kshs 34.5 billion receivable never reflected to shareholders. Published on Substack and Medium.

SACCO Sector — NPL & Delinquency Comparison *(In progress)*

Comparing self-reported NPL and delinquency figures against SASRA-published data across four Kenyan deposit-taking SACCOs.

EXPERIENCE

Founder & Principal Analyst — NairobiPulse Intelligence · Nairobi County, Kenya

Produce quarterly apartment market intelligence for Kenyan DT-SACCOs and mortgage lending desks, including DSCR stress testing across Nairobi sub-markets.

Data Analysis & Research Intern — EcoServants · Remote

Built a Python ETL pipeline to automate lead generation from public business directories, supporting environmental research across Kenya.

Data Visualization Trainee — Excelerate · Remote

Designed and built a multi-page interactive Power BI dashboard analyzing 4,999 admissions leads for a U.S. university; built the full ETL pipeline in Power Query and wrote core DAX measures.

Data Scientist (Job Simulation) — Forage / Deloitte Australia · Remote

Completed Deloitte Australia's official Data Analytics virtual simulation, working through real-world business analytics and data interpretation scenarios.

EDUCATION & CREDENTIALS

Economics & Data Analytics (undergraduate, ongoing) — Mount Kenya University

Certificate, AI-Powered Data Analysis — Rochester Institute of Technology (via Excelerate/Vempower)

Certificate, Data Visualization — Saint Louis University (Star Performer, via Forage)

Certificate, Data Analytics Job Simulation — Deloitte Australia (via Forage)

TECHNICAL SKILLS

Languages & Querying: Python, SQL, R

Data & Analysis: Pandas, NumPy, Scikit-learn, BeautifulSoup

Visualisation & BI: Power BI, Tableau, Streamlit, Matplotlib

Databases: PostgreSQL, MySQL, Google BigQuery

Tools: Excel, Git, VS Code

Open to Credit Risk Analyst, Data Analyst, SQL Analyst, and BI Developer roles — remote or Nairobi-based.
